# Kimpe

Everywhere that you need us!

Specializes in trade, production and distribution of raw materials and chemical products. We import, transform and distribute the best ores and chemical products in all Europe.

***Kimpe***

**Frecon**

# Experience

- More than fifteen years of business activities have enabled us to develop a wide range of products for an ever-growing number of customers
- Our customized service policy and our various production units allow us to stay close to our customers

# Quality and Innovation

- Quality – To check and then check again! This is the foundation of our development – from the first through to the last lorry that comes out of the plant, each product is checked to guarantee an ever-greater degree of consistency and quality
- Innovation through constant research. Research and development for new products and new processes are our priority

# Products

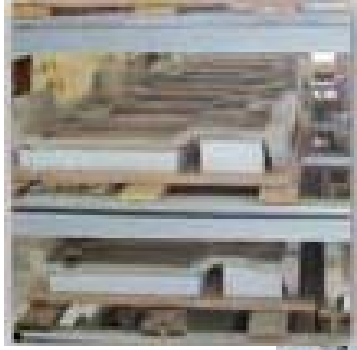

- Slurry
  - Consists of a suspension of chemical products or insoluble minerals in water providing a stable, fluid and easy-to-handle results not requiring any stirring
- H-Shaped Tile Cassettes
  - Made of cordierite-mullite

# Slurry Products

- Barium Carbonate Slurry “K” lines
- Manganese Oxide Slurry “Color K” lines
- Iron Oxide Slurry “F.L.O.R” lines
- Titanium Oxide Slurry “AV” lines
- Cromite Slurry “MP” lines

# H-Cassettes

- Raw materials are rigorously selected for their purity and then ground and mixed according to pre-established formulas
- The slip is poured into plaster moulds
- After removal from the mould, the H-Cassettes are placed on specific supports and dried
- After drying, the H-Cassettes are fired at temperatures close to  $1400^{\circ}\text{C}^{\circ}$
- After firing, they are precision ground to meet the tolerances imposed by the customer

# Industrial Sectors

- Ceramic
- Clay Roof Tiles and Bricks
- Refractory
- Concrete
- Glass
- Rubber
- Water Treatment
- Paper Industry
- Detergence
- Fertilizers
